

ePrescription and other eServices from the perspective of a family doctor

Le Vallikivi
Family Doctor
Estonian Family Doctors Association,
Member of the Board

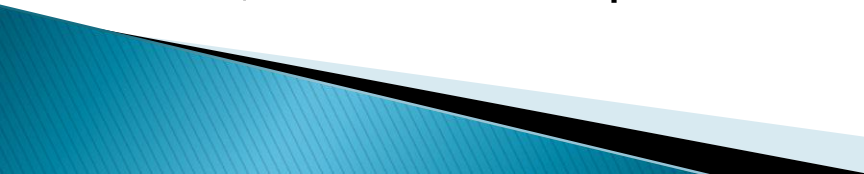

Central Health Information System

- ▶ Started 2008
 - ▶ Designed for:
 - ▶ People – for looking and uploading their health data
 - ▶ Health care providers – obligation to upload the data and opportunity to see the data
 - ▶ Government – for collecting aggregated data for statistics and planning health policy
- 

eServices for family doctors 2017

- ▶ E-Prescriptions with drug interaction decision support
- ▶ E-Health records in central health information system both in primary and secondary care
- ▶ Digital Archive of medical Images
- ▶ E-Health declarations and e-health certificates (for driving licence)
- ▶ E-Consultations in 13 specialities
- ▶ E-Sick leaves
- ▶ E-Bills to Health Insurance Fund
- ▶ E-Continuous Medical Education – SVOOG
- ▶ E-Practice Quality System

Patient's opportunities in HIS 2017:

- ▶ Access their health records sent to HIS
 - ▶ Open and close access to their health data for doctors(s) and representatives
 - ▶ To see the activity log – when and by whom their health information have been accessed
 - ▶ Make an statement of intent
 - ▶ Fill out health declarations
 - ▶ Enter and change his/her contact data
 - ▶ Make an appointment via digital registration system • View his/her health expences
- 

Advantages of E-health services

- ▶ Simple – new prescription is only a few clicks away
- ▶ Safe – every user leaves a trail, safe identification procedure
- ▶ Convenient – saving time and money
- ▶ Complete overview of the patient
- ▶ Quality and safety – all documents are 100% readable,
- ▶ Reduces the patronizing attitude in medicine
- ▶ Improves shared decision making
- ▶ Improves health literacy

Fears and disadvantages of HIS

- ▶ Limited or no personal contact with the doctor
- ▶ Malfunctioning of the system causes problems and time-loss
- ▶ Fear of violating confidentiality
- ▶ Limited or no overview of prescriptions
- ▶ Fear of the leakage of personal information
- ▶ Fear of being observed

What's next?

- ↪ eFamily Medicine center – a secure environment for a person to communicate with their Family doctor – renewing a prescription, reporting to be ill, asking a question, making an appointment, self-reporting his health condition etc

AVALEHT

e-Perearstikeskus

Tere tulemast!

Olete e-Perearstikeskuse avalehel. Oma perearstikeskuse poole pöördumiseks, tervisepäeviku täitmiseks, terviseandmete vaatamiseks või saabunud teadete lugemiseks palume sisse logida.
